

Work Experiences:
Delivering a cloud based web solution that provides users with timely, accurate and consistent information about work placements and other programmes.

“I have no hesitation in recommending Work Experiences as a partner to address any school or college with a work experience management requirement.”
Chitinder Tahli CEO Work N Learn

Work Experiences

Supporting Digital Transformation

The challenge

With growing business expectation and the need for a flexible, uncomplicated, software solution to manage expansion, Work N Learn needed a comprehensive work placement management tool to drive its new service for main stream and alternative provision.

The solution

Through our proven development processes and agile approach Work Experiences have worked alongside Work N Learn to enhance its complex service delivery by providing uncomplicated digital software solutions to support a fast paced delivery model. By tailoring our flexible solution to suit we were able to support Work N Learn in developing a cost effective system solution that fully met their current requirements and allowed room for sustainable system development and delivery.

“The support from Work Experiences, has been exceptional - It has been a pleasure to work alongside an amazing company”.
Chitinder Tahli CEO Work N Learn

Background

Work N Learn are a provider of tailor made educational programmes supporting students in School and Further Education. With this expanding alternative education provision Work N Learn needed a comprehensive software solution to manage its expansion and growing business requirements.

Work N Learn wanted a reliable software solution to meet its complex business need.

On recommendation Work N Learn appointed Work Experiences as their software provider. Expertise was required to support and enhance the service and demonstrate to Work N Learn how combined expertise and proven digital processes could support and enhance its delivery to meet the complexity of the service levels it is delivering.

How did we do it?

- Collaborative working to identify quick-wins and improve service quality.
- Speedy development of a software solution to meet growing business need.
- Enhanced connectivity to securely and efficiently manage data.
- Implemented bespoke processes particularly focussed on information management.
- Reviewed and improved reporting detail and implemented bespoke reports suite.
- Delivered formal staff training, embedding 2 way skills and knowledge transfer.

About Work Experiences...

Work Experiences are a division of Executives on the Web Ltd, which provides online executive recruitment solutions. Work Experiences are working with education and training providers, to put in place better, smarter and faster ways of managing work placements.

We will help reduce costs, improve services and help organisations become more sustainable, making the management of work experience smarter and better for all. For more information or to speak to us about how we can help you, please contact:

Adrian Humphreys Divisional Director.

What did we do?

Working in close collaboration with Work N Learn, Work Experiences designed a software management solution to enhance their delivery to their clients. The new model incorporated the application of proven solution processes to meet educational standards and to support the Work N Learn team delivering tangible and measurable service improvement for all.

Outcomes

- Provided cloud based solution to enable 24hr access underpinned by a variety of cloud based and off line forms to support business efficiency.
- Developed a visual display facility along with the ability to search a number of complex records quickly.
- Comprehensive student and administrative management system.
- All data is secured in SSL safely stored, giving the business the ability to cope with large amounts of complex data with data back up in operation locally and externally.

“Having worked with competing CMS in other vocations and areas, we feel that this is by far the most effective and user friendly to date.”
